Dear Sir or Madame,

I am thrilled to be applying for the open Backend Software Engineer position at Wizards of the Coast. After reviewing your job description, it is clear that you're looking for an enthusiastic applicant that can be relied upon to fully engage with the role and develop professionally in a self-motivated manner. Given these requirements, I believe I am the perfect candidate for the job.

I am a quality-oriented professional who has been consistently praised as focused by my co-workers and management. Over the course of my career, I've developed a skill set directly relevant to the role you are hiring for, including technical knowledge, creativity, and enthusiasm. My work in software has involved redesigning legacy monolithic architecture as both front-end user interface applications and REST API back ends. Overall, I have consistently demonstrated reliability, interpersonal skills, and organizational abilities in every aspect of my Software Engineering position at 80/20 LLC., and I invite you to review my detailed achievements in the attached resume. I have also developed as a leader and role model in the workplace through supervisory roles in different fields.

After reviewing my resume, I hope you will agree that I am the type of positive and driven candidate that you are looking for. I am excited to elaborate on how my proven skills and abilities will benefit the Customer Service department. Please contact me at 260-409-1728 or via email at jefflongsworth@alumni.iu.edu to arrange for a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Jeffrey Longsworth
